

FLAG

Save Time & Never Miss an Alert - Automatically Track Applications at the FCC

FLAG automatically reports FCC filings relevant to your station, clients or geographic areas of interest

Time is of the essence when tracking FCC activity, yet it's extremely time-consuming to manually search Public Notices for information pertaining to your/your clients' facilities. Let FLAG do the monitoring for you.

Save Time and Be Proactive

Simple to set up and use, FLAG automates the work required to monitor your clients' applications at the FCC. Acting like an alert system, FLAG monitors a station or any geographical area(s) of interest in FCC Public Notice items then generates a report detailing all recent FCC activities.

Reports are delivered by email and available on-demand or automatically at the end of each week.

BIA/Kelsey FCC Filing Notification
9/30/2014 2:44:41 PM
